About this Document

This document is all about the Custody module of the BackConnect Application. It describes how to setup the basic data, the tariff structures and configure the system default. It also describes the updating of custody, process of bill generation, and the reports.

This document does not explain the industry practices or the general concepts of the Custody management. It is assumed that the readers of this document and the users of the Custody system of the BackConnect already possess a strong working knowledge of the conventions used and the practices followed in this business.

This document also does not explain the general operations (saving, editing and deleting of records etc) and the common functions available in the system. To make you familiar about the basics of the BackConnect, kindly go through the 'BackConnect User Manual – Getting started' document.

Document Composition

This document is composed of three major segments. The first segment (Section 2 to 4) discusses about setting up and configuring the Custody module for daily operations. It contains:

- Defining the required data for custody movements;
- Setting up the tariff structure; and
- Configuring the system defaults for custody transactions.

Audience

The targeted audience of this document is the users of the Equity Trading and Settlement module of the **BackConnect** application

Related Documents

Every module has its own specific user manual that covers the features and issues related with that business, while *Getting Started* is a must read document for all the users of this system.

The module wise documents available in the system (are):

- User Manual – Equity Trading and Settlement Module
- User Manual – Custody Module
- User Manual – GL Module

For Administrators there is an *Administrators Guide* and *Installation Guide* as well. Senior managers of the GL system are required to study the *Administrators Guide* (especially the *Authority Management* section) to properly setup the user access controls and the interfaces with other modules, if required.

Conventions

CONVENTION / STYLE	Purpose
Bold	Name of application objects, e.g. menus, screens, buttons etc.
Mono-spaced	The text should be typed, or keyboard keys.
<i>Italic</i>	Name of other documents and sections.

Custody Activity:

This screen is used to define and maintain the list of different activities in the Custody e.g. send to CDC, receive from client etc. List of already defined/existing records can be viewed and selected through LIST tab.

Figure 1: Custody Activity

Activities can be of type IN or OUT type. You can also associated the return activity codes, e.g. for IN type of activity, you can select an OUT type of activity as a return and vice versa

Screen Explanation

Field	Function
Activity Code	A unique activity code
Activity	Enter activity description in this field
Short Name	Give a short name to activity
Activity Group	Select from drop down list activity group CDC: it will mark activity as CDC activity. Physical: it will mark activity as physical activity.
Equity/FIS	Select equity or FIS form drop down list to market activity for respective business area
In/Out	Activities defined are either IN or OUT. IN: shares are transferred in. OUT: shares are transferred out.
Return Activity Code	Enter return activity code for corporate activities.
CDC Actual Charges Rate	Enter CDC actual charges rate
Chargeable	Check this box to make this activity chargeable
Corporate Activity	Check this box to mark activity as corporate activity
Non Tradable Activity	Check this box to make activity as non tradable
Post	Check to post the transaction

Announcements:

This screen is used to enter the announcements into the system. List of already defined/existing records can be viewed and selected through LIST tab.

Figure 2: Announcements

Field	Function
Transaction Id	An auto generated unique ID
Announcement Date	Date of announcement
Symbol	Select from LOV, symbol of security for which announcement is to be inserted
Start Book Closure	Enter start book closure date
End book closure	Enter end book closure date
Spot date	Enter spot date
Spot date till	Enter spot date ending date
Right share	Enter right shares announced by company
Bonus share	Enter bonus shares announced by company
Premium	Enter premium announced by company
Interim/final	Select interim announcement or final announcement by selecting respective radio buttons
Dividend	Enter per share dividend as announced by company
Year Ended	Enter year ended
AGM Date	Enter annual general meeting date
EOGM Date	Enter extra ordinary general meeting date
Face value	Enter face value of shares
Right Symbol	Select from LOV, right share symbol
Discount	Enter discount as announced
Active	Check to make announcement active
Post	Check to post the transaction

Custody System:

System defaults are some very basic information about the custody module of the application. It is very important to set the proper values in the system. System Defaults are either set by you or your administrator, or when you receive the software. Some of the default values can be changed at run time; however, most of the values are not changeable after the first setup, so it is very important to setup proper values at the first instance.

Figure 3: System setting

The Custody System screen has four sections.

Custody Charges	In Custody Charges you can associate different type of Charges with the Expenses you have defined in the Custody Expense Master Screen.
Receive Activities	In Receive Activities you can associate different type of 'IN' activities that you have defined in Custody Activity Screen.
Delivery Activities	In Delivery Activities you can associate different type of 'OUT' activities that you have defined in the Custody Activity Screen.
General Section	In general section you can define the transaction type and book type of Custody bill, and the department and business area of the custody department i.e. which department and business area respectively maintains the custody.

Custody Charges

Field	Function
Phy. Balance	Select from LOV physical balance custody charges
CDC Balance	Select from LOV, CDC balance custody charges
Transaction	Select from LOV, transaction
Expense	Select from LOV, expense

Activity Groups

* CDC CDC

* Physical Physical

Field	Function
CDC	Select CDC from drop down list, by default when system is delivered it is configured and disabled so user can not change it
Physical	Select Physical from drop down list, by default when system is delivered it is configured and disabled so user can not change it

Receive Activities:

Enter default system receive activities

Receive Activities

Client Shares

* CDC RECEIVE FROM CUSTOMER(CDC) * Physical RECEIVE FROM CUSTOMER(PHYSICAL)

* Bonus RECEIVE BONUS(CDC) FROM CO Physical Bonus RECEIVED BONUS (PHYSICAL)

* Right RECEIVE RIGHT LETTER FROM CO

Field	Function
CDC	Enter CDC Receive activity
Physical	Enter physical receive activity
Bonus	Enter bonus receive activity
Physical Bonus	Enter physical bonus receive activity
Right	Enter right receive activity.

Deliver activities:

This section is used to define default delivery activities of custody

Delivery Activities

* Borrow S.E. DELIVERED TO S.E. (EXPSOURE)CDC * Transfer Phy. DELIVERED FOR TRANSFER(PHYSICAL)

* Transfer CDC DELIVERED FOR TRANSFER (CDC) * Verifying DELIVERED FOR VERIFICATION

* Pending DELIVERED PENDING * Bank DELIVERED TO BANK(CDC)

Withdrawal DELIVERED SHARES FOR WITHDRAWAL

Field	Function
Borrow S.E.	Enter deliver activity for borrow stock exchange
Transfer Phy.	Select deliver activity for physical transfer
Transfer CDC	Select deliver activity fro CDC transfer
Verifying	Select deliver activity for verification
Pending	Select deliver activity for pending status
Bank	Select deliver activity for bank

Withdrawal	Select deliver activity for withdrawal
------------	--

General Activities:

This section defines general activities for custody.

* Custody Area	Custody	* Custody Dept.	EQUITY SALES
* Company Ordinance	1982-COMPANY ORDINANCE	* GL Book Type	Custody Book
* GL Trans. Type	NORMAL ENTRIES	<input checked="" type="checkbox"/> Post	

Field	Function
Custody	Select custody area
Custody Dept.	Select custody department
Company Ordinance	Enter company ordinance
GL Book Type	Select GL book type
GL Trans. Type	Select Transaction type
Post	Check to post

- Import
- Import Bonus Activity File

Softech Systems

(Private) Limited

Shares Transaction Detail:

This is used to enter shares transaction detail in the system. This screen can be accessed from given navigation as well as it can be called from custody master.

Figure 4: Shares Transaction Detail

Field	Function
Folio #	An auto generated unique next available folio number will be populated in this field,
Certificate Folio	Enter certificate folio number
Transaction ID	Enter transaction id from LOV, it will be entered automatically if this screen is called from Custody Master screen but user have to select transaction id if it is accessed through navigation given above.
Volume	Enter volume of shares received
Certificate No From	Enter starting number of certificates
Certificate No To	Enter ending number of certificates
Distinct No From	Enter distinct starting number
Distinct No To	Enter distinct ending number
No. of Cert.	Enter number of certificates
No. of Shares	Enter number of shares
Post	Check to post the transaction.

Update CDC Balance File:

This file imports the positions from the CDC Balance file. You can then compare your house and CDC positions by viewing the CDC Balance Comparison report

Figure 5: Update CDC Balance File

Field	Function
Browse	Press this button to navigate to import file
Update	Press this button to start importing file
Close	Press this button to close windows.

Custody Master:

This screen is used to enter and maintain the custody transactions. All custody activities in the system are entered through this screen.

Figure 6: Custody Master

This screen has four major sections; these are Custody Master Record, Equity Billing, Custody Billing, and Net Custody Position.

Custody Master Record section contains all the fields that could be updated from the screen. All these fields are related to the insertion of custody transaction in the system.

Equity Billing section contains the information related to the Equity Bill attached with the respective transaction.

Custody Billing section contains the information related to the Custody Bill attached with the respective transaction.

Net Custody Position section tells the “Net Custody Position of the Selected Client against the security in the record”.

All the information in the Billing sections is un-editable and if the information related to billing is attached with the record then the **Custody Master Record** section also becomes un-editable

Field	Function
ID	Unique auto increment primary key
Date	Enter date of transaction, by default system date appears in most of date fields
Client Code	Select from LOV, client to enter its transaction
Client Name	As client code is selected its name will auto populate in this field.
Branch	Select from drop down branch of client
Symbol	Select from LOV, security to enter its transaction for selected client.
Security	As symbol is selected security will auto populate in this field Alternatively, user can enter security from LOV and its symbol will auto populate
Sector	Sector of security will auto populate in this field. It is disabled.
Activity	Select activity from drop down list of the transaction
In/Out	Select as transaction either IN or OUT type
Quantity Registered	Enter registered quantity of shares
Un-Registered	Enter un-registered quantity of shares
Book Closing	Select from LOV, book closing
Remarks	Enter remarks to attach them with transaction
Post	Check to post the transaction
Shares Details	Press this button to open shares details to attach shares detail information with transaction.

Import:

Import Bonus Activity File

This screen is used to import bonus shares activity file.

Import Bonus Activity File

File Name

Transaction Date

Invalid Records

Line #	Status	Reason

Path

Note:
File Format : "Client_Name","CDC_Group_Code","Symbol","Bonus Share"

Figure 7: Import Bonus Activity File

Field	Function
File name	Press button besides this field to navigate to file to be imported, file format of imported file is given at the bottom of screen
Transaction Date	Enter transaction date
Execute	Press this button to start importing file in to the system
Invalid Records: records that could not be imported will appear in this grid with proper reason as why these could not be imported.	
Line #	Line number where record exists that could not be uploaded on file
Status	Status either Duplicate or Invalid will populate
Reason	Reason as why particular record could not be entered in this system
Path	Select path where user want to export errors of records that could not be imported in file
Export	Press this button to export errors.
